Rethinking Teaching in Higher Education Nov 29 2019 This book is intended for faculty and faculty developers, as well as for deans, chairs, and directors responsible for promoting teaching and learning in higher education. Intentionally non-technical, it engages readers reflectively with a process for developing teaching and details the planning necessary to apply this process to teaching within disciplines. The book centers on McGill University's week-long *Course Design and Teaching Workshop* that the contributors have offered together for more than ten years. It follows the five day format of the workshop - covering the analysis of course content, conceptions of learning, the selection of appropriate teaching strategies, the evaluation of student learning, and evaluation of teaching - in a way that reflects the spontaneity of the debates it has engendered and the

workshop's evolutionary changes. The structure shows faculty members conceptualizing new courses or re-examining their teaching of existing courses, and translating the insights gained from the workshop to specific disciplinary content and learning outcomes. In addition four previous participants of the workshop write about its influence on their personal thinking about the practice of teaching. The final two chapters describe the structure and evolving role of McGill's Centre for University Teaching and Learning. The authors describe its objectives in fostering an evidence-based teaching culture and providing a practical support structure with limited resources. They highlight achievements in disseminating teaching expertise across their campus, and their vision for the future role of faculty development. This book provides faculty developers and administrators with valuable non-prescriptive models and challenging ideas that promote faculty development in general and university teaching in particular. It engages faculty members in the process of course design in a way that is learning centered and can lead to deep student learning.

Choice and Agency in the Writing Workshop Aug 26 2019 Step into a classroom and "listen in" on the writing initiatives and motivations of students who are given significant choice and agency in the development of their writing. Discover why upper elementary children need ways to become literate as kids, not merely as prototypes of adults or teenagers. Filled with rich portraits of in-class writing interactions and challenges, this book highlights various themes that help teachers become better observers and more responsive to the complexity of writing in children's lives. Key themes include drawing and popular media in children's learning, the challenges of listening to students during conferences, the intersections of writing and

relationships, the roles of sharing and publishing writing, and the importance of shaping a writing curriculum through dialogue. "Fred Hamel not only offers us readers insight into the text-mediated dramas of children's lives, he allows us into the sort of pedagogical reflections that keep us all in the flow of becoming." –From the Foreword by Anne Haas Dyson, University of Illinois "This timely book is about the experimentation, flexibility, vulnerabilities, and risks of educators when they don't assume to always know what is best for writers. Through classroom examples, Hamel helps us to see the complex and entangled identities of teachers and students. This book asks us all to consider putting less emphasis on expected writing endpoints and think more about the social processes and relationships of literacies coming to be." –Candace R. Kuby, University of Missouri and author of *Go Be a Writer! Expanding the Curricular Boundaries of Literacy Learning with Children*

Conferring Oct 21 2021 In his workshops with teachers over the years, Patrick Allen has encountered a long list of "counterfeit beliefs" about the process of conferring with students, including such comments as: "I don't have time. I don't know what questions to ask, It's too hard, I don't know what to write in my notes, I don't even take notes, I don't know how to go deep. . ." In *Conferring: The Keystone of Reader's Workshop*, Allen argues that the benefits of conferring are well-worth the effort of learning to do it well. And then he sets out to show teachers how to overcome all of their perceived obstacles, and make the somewhat intangible aspect of conferring tangible. Just as the keystone--a symmetrical, wedge-shaped stone at the center of an arch--forms the foundation of a structure, conferring lays the groundwork for effective reading instruction. Allen defines the word confer as a verb "meaning to consult together, compare opinions, or carry on a conversation." Conferences with students are purposeful conversations that scaffold reading comprehension strategies that guide the reader's progress, and ultimately, through the gradual release of responsibility, create independent readers. Allen begins by explaining what conferring is and what it's not, and then unpacks the essential components of the process: intimacy (the social context of conferring); rigor (the cognitive context); and inquiry (the analytical context). He explores the guiding principles of conferring--including goal setting, instruction points, listening, rapport, challenges, and teacher learning--and provides questions that lead teachers through the reader's conference from start to finish.

When Writers Drive the Workshop Dec 11 2020 In this practical, engaging book, former elementary school teacher and university professor Brian Kissel asks teachers to go back to the roots of writing workshop. What happens when students, not planned teaching points, lead writing conferences? What happens when students, not tests, determine what they learned through reflection and self-evaluation? Writing instruction has shifted in recent years to more accountability, taking the focus away from the writer. This book explores what happens when empowered writers direct the writing workshop. Through stories from real classrooms, Brian reveals that no matter where children come from, they all have the powerful, shared need to be heard. And when children choose their writing topics, their lives unfold onto the page and teachers are educated by the young voices and bold choices of these writers. Written in an engaging, teacher-to-teacher style, this book focuses on four key components of writing workshop, with an eye on what happens when teachers step back and allow students to drive the instruction: Conferring sessions where students lead and teachers listen Author's Chair where students set the agenda and ask for feedback Reflection time and structures for students to set goals and expectations for themselves Mini-lessons that allow for detours based on students' needs, not teacher or

curricular goals Each of the chapters includes practical ideas, a section of Guiding Beliefs, a list of Frequently Asked Questions, and some Digital Diversions to help teachers see the digital possibilities in their classrooms.
