What is classical about Classical civilization? In one of the most audacious works of scholarship ever written, Martin Bernal challenges the whole basis of our thinking about this question. Classical civilization, he argues, has

deep roots in Afroasiatic cultures. But these Afroasiatic influences have been systematically ignored, denied or suppressed since the eighteenth century - chiefly for racist reasons. Volume II is concerned with the archaeological and documentary evidence for contacts between Egypt and the Levant on the one hand and the Aegean on the other, during the Bronze Age from c. 3400 B.C. to c. 1100 B.C.

Big Oil and Gas Versus Democracy—Winner Take All “A rollickingly well-written book, filled with fascinating,

exciting, and alarming stories about the impact of the oil and gas industry on the world today.”—The New York Times Book Review In 2010, the words “earthquake swarm” entered the lexicon in Oklahoma. That same year, a trove of Michael Jackson memorabilia—including his iconic crystal-encrusted white glove—was sold at auction for over \$1 million to a guy who was, officially, just the lowly forestry minister of the tiny nation of Equatorial Guinea. And in 2014, revolutionaries in Ukraine raided the palace of their ousted president and found a zoo of peacocks, gilded toilets, and a floating restaurant modeled after a

Spanish galleon. Unlikely as it might seem, there is a thread connecting these events, and Rachel Maddow follows it to its crooked source: the unimaginably lucrative and equally corrupting oil and gas industry. With her trademark black humor, Maddow takes us on a switchback journey around the globe, revealing the greed and incompetence of Big Oil and Gas along the way, and drawing a surprising conclusion about why the Russian government hacked the 2016 U.S. election. She deftly shows how Russia's rich reserves of crude have, paradoxically, stunted its growth, forcing Vladimir Putin to maintain his power by

spreading Russia's rot into its rivals, its neighbors, the West's most important alliances, and the United States. Chevron, BP, and a host of other industry players get their star turn, most notably ExxonMobil and the deceptively well-behaved Rex Tillerson. The oil and gas industry has weakened democracies in developed and developing countries, fouled oceans and rivers, and propped up authoritarian thieves and killers. But being outraged at it is, according to Maddow, "like being indignant when a lion takes down and eats a gazelle. You can't really blame the lion. It's in her nature." Blowout is a call to contain the lion: to stop subsidizing the wealthiest

businesses on earth, to fight for transparency, and to check the influence of the world's most destructive industry and its enablers. The stakes have never been higher. As Maddow writes, "Democracy either wins this one or disappears." *Explorer's Guide Virginia* Apr 26 2022 With Explorer's Guides, expert authors and helpful icons make it easy to locate places of extra value, family-friendly activities, and excellent restaurants and lodgings. The New Global Frontier Sep 27 2019 The world's developing countries will be experiencing massive increases

in their urban populations over the 21st century. If managed intelligently and humanely, this growth can pave the way to sustainable development; otherwise, it will favour higher levels of poverty and environmental stress. The outcome depends on decisions being made now. The principal theme that runs through this volume is the need to transform urbanization into a positive force for development. Part I of this book reviews the demography of the urban transition, stressing the importance of beneficial rural-urban connections and challenging commonly held misconceptions. Part II asks how urban housing, land and

service provision can be improved in the face of rapid urban expansion, drawing lessons from experiences around the world. Part III analyses the challenges and opportunities that urbanization presents for improving living environments and reducing pressures on local and global ecosystems. These social and environmental challenges must be met in the context of fast-changing demographic circumstances; Part IV explores the range of opportunities that these transformations represent. These challenges and opportunities vary greatly across Africa, Asia and Latin America, as detailed in Part V. Published with IIED and

A Fierce Green Fire Apr 14 2021 For anyone interested in wildlife, birds, wilderness areas, parks, ecology, conservation, environmental literature, and ethics, the name Aldo Leopold is sure to pop up. Since first publication, *Aldo Leopold: A Fierce Green Fire* has remained the classic short, inspiring biography of Leopold--the perfect companion to reading his ever popular *A Sand County Almanac*. Winning numerous awards, this comprehensive account of his life story is dynamic and readable, written in the context of the history of American conservation and illustrated with historic photographs.

Marybeth Lorbiecki has now enriched *A Fierce Green Fire* in a way no other biography on Leopold has, adding numerous chapters on the ripple effects of his ideas, books, ecological vision, land ethic, and Shack, as well as of the ecological contributions of his children, graduate students, contemporary scholars, and organizations--and the wilderness lands he helped preserve. Lorbiecki weaves these stories and factual information into the biography in a compelling way that keeps both lay and academic readers engaged. In the introduction to this edition, Lorbiecki makes it clear how much better our lives are because Leopold lived and

why today we so radically need what he left us to bring about paradigm shifts in our ethical, economic, and cultural thinking. Instead of losing relevance, Leopold's legacy has gained ever more necessity and traction in the face of contemporary national and world challenges, such as species loss and climate change. Even the phenological studies he started at as a hobby are proving valuable, showing the climatic shifts that have occurred at the Shack lands since the 1930s, recognized by the plants and animals.

Ensuring Minority Success in Corporate Management

Apr 02 2020 To be a corporate executive in America is to achieve a universally recognized measure of personal and professional success. The high income, privilege, prestige, and authority enjoyed by most corporate executives all attest to "making it." That is why the advancement of racial and ethnic minorities into the executive suite is one of the key barometers of the nation's progress toward full equality of

opportunity. But the quest for equal opportunity in corporate management has been difficult and frustrating. Black, Hispanic, and Asian men and women are rarely found among those who run or significantly influence the direction of American corporations. The wide gap between the expectation and the reality is a continuing topic of interest to business leaders and racial and ethnic minorities, as well as to scholars of the business scene. This book edited by Thompson and DiTomaso contributes significantly to our understanding of this problem, and, most importantly, provides useful guidelines on what to do about it. Interest in the

diversity of corporate management comes at a time of unprecedented challenge to United States success in the world economy. American business must now compete against aggressive producers and financiers in Western Europe and Japan. More competition also has emerged from some of the rapidly developing countries in Latin America and the Pacific Rim. Our ability to design, manufacture, sell, and export goods and services in a global marketplace will increasingly determine our standard of living and prominence on the world stage.

romantic saga, Bella has one final choice to make. Should she stay mortal and strengthen her connection to the werewolves, or leave it all behind to become a vampire? When you loved the one who was killing you, it left you no options. How could you run, how could you fight, when doing so would hurt that beloved one? If your life was all you had to give, how could you not give it? If it was someone you truly loved? To be irrevocably in love with a vampire is both fantasy and nightmare woven into a dangerously heightened reality for Bella Swan. Pulled in one direction by her intense passion for Edward Cullen, and

in another by her profound connection to werewolf Jacob Black, a tumultuous year of temptation, loss, and strife have led her to the ultimate turning point. Her imminent choice to either join the dark but seductive world of immortals or to pursue a fully human life has become the thread from which the fates of two tribes hangs. This astonishing, breathlessly anticipated conclusion to the Twilight Saga illuminates the secrets and mysteries of this spellbinding romantic epic. It's here! #1 bestselling author Stephenie Meyer makes a triumphant return to the world of Twilight with the highly anticipated companion,

Canada's involvement, a leading journalist offers a fascinating assessment of Canada's past and present role in the Afghan war. Of the 33,000 troops under NATO command in Afghanistan in October 2006, 12,000 were Americans and 2,500 were Canadians. Deployed to southern Afghanistan, the Canadian forces were charged with ending the violent insurgency in Kandahar Province. *The Savage War* offers a compelling look at how the war has been conducted by Canada and its allies on the ground and at the highest echelons. With unprecedented access to classified documents and the exceptional storytelling

skills that have made him an award-winning reporter, Murray Brewster offers a powerful new perspective on the war. And as Canada prepares to take on a new mission in Afghanistan, this is the first comprehensive account of the five most significant years of the war and the key moments in it that shaped history. Murray Brewster provides tough-

minded analysis and a critique of bureaucracy as well as revelations about corruption—sure to incite commentary and stir controversy. Includes eyewitness accounts, exclusive interviews, and access to classified documents. Wavefront Optics for Vision

Correction Dec 11 2020 This book addresses some of the issues in visual optics with a functional analysis of ocular

aberrations, especially for the purpose of vision correction. The basis is the analytical representation of ocular aberrations with a set of orthonormal polynomials, such as Zernike polynomials or the Fourier series. Although the aim of this book is the application of wavefront optics to laser vision correction, most of the theories discussed are equally applicable to other methods of vision correction, such as contact lenses and intraocular lenses.
